

ALEXEY LAGUN

FRONTEND DEVELOPER | REACT, TYPESCRIPT

Brest, Belarus [@AlexeyLagun](#) [linkedin](#) [portfolio](#)

SUMMARY

Experienced in TypeScript and React, skilled at translating product needs into solid, maintainable UIs. Value clean, well-architected code and modern tools, focusing on performant interfaces with excellent UX. I aim to influence product outcomes and improve frontend efficiency. Seeking to grow and contribute within a collaborative team.

SKILLS

React · JavaScript (ES6+) · TypeScript · Next.js · Redux Toolkit · RTK Query · React Router
SCSS/SASS · Styled Components · CSS Modules · Ant Design · Material UI · Storybook
Git · Vite · Webpack · Jest · ESLint · Prettier · Figma · REST API

WORK EXPERIENCE | 2+ YEAR

FRONTEND DEVELOPER (Next.js + Typescript)

Self-employed

[Resaver](#) 04/2026 - Present

Corporate website for an industrial process automation company

- Architected projects from scratch using the FSD methodology.
- Developed a design system with dark/light modes using CSS Custom Properties + SCSS Modules.
- Built an admin panel featuring authentication (JWT), news CRUD functionality, and a TipTap rich-text editor.
- Configured SSR + i18n (RU/EN) and route protection via Next.js middleware.
- Integrated MSW for backend-less development.
- Implemented responsive design (mobile-friendly).

FRONTEND DEVELOPER (React + TypeScript)

[EasySales](#) 05/2024 - 09/2025

Internal CRM system for efficient use and generation of product images

- Development of new frontend functionality
- Optimized key pages — reduced load time by 15%
- Developed drag-and-drop interfaces and dynamic forms
- Designed a new user onboarding flow, accelerating first-session activation
- Led code reviews and enforced code quality standards (ESLint, Prettier)
- Integrated REST API endpoints across multiple product areas

FRONTEND DEVELOPER (React + TypeScript)

[SpeechUp](#) 05/2023 - 05/2024

Internal CRM for the effective use and management of student educational processes

- Developed new frontend features and functionalities to enhance the system.
- Participated in technical discussions and proposed effective solutions.
- Implemented UI components based on Figma mockups to ensure visual consistency.
- Resolved various software bugs, enhancing overall system stability.
- Maintained code quality through regular code reviews
